

ROOM-CARD-SCANNER

The Reserva Card Scanner can be used in conjunction with Reserva Room Signs to allow greater control over room booking. This enforces the following optional rules:

- ◆ Only a meeting attendee may check in to meeting
- ◆ Only a meeting attendee may shorten, extend or end a meeting
- ◆ When booking a meeting the user is added as an attendee

Please note the Reserva Connector compatibility listed below. The Reserva Connection Manager uses Active Directory for authentication, user accounts in Active Directory must match those in the calendar system. ONELAN strongly recommends that an example card is supplied to ONELAN for validation prior to ordering.
